SUMMARY

Backend engineer with four years of experience building payment and data services.

EXPERIENCE

Software Engineer, Northwind Payments | 2022 - Present

- Worked on the checkout service with the payments team to improve API performance
- Helped with the migration of 12 legacy services to Kubernetes
- Wrote documentation for the internal deployment tool
- Reduced checkout latency by 35% by caching product lookups in Redis
- Responsible for writing unit tests for the billing API

Software Engineering Intern, Contoso Analytics | 2021

- Built a Python script to clean survey data for the research team
- Collaborated with designers on a new onboarding flow for the dashboard

PROJECTS

Budget Buddy | React, Node.js, PostgreSQL

- Made a budgeting app that tracks spending across bank accounts
- Set up CI with GitHub Actions to run tests on every pull request

EDUCATION

BSc Computer Science, National University | 2018 - 2022

SKILLS

Python, Go, TypeScript, React, Node.js, PostgreSQL, Redis, Docker, Kubernetes
